Combat Strength Modifiers:

- All attacks across Minor rivers/bridges and Amphibious Assault are at ½ strength (rounded up).
- Armor Advantage into non-Fortified, non-Wooded/Jungle, non-City Flat or Rough is Strength x 2[1].
- Mechanized Advantage into non-Fortified,non-Wooded/Jungle, non-City Flat or Rough is Strength x 1½ (rounded up)[1].
- Mechanized Infantry and Armor units are x ½ (rounded up) when attacking into Marsh, Highland, Highland Woods, Mountain, and High Mountain and any Jungle.
- Leg Unit defense in Urban/Jungle hex is Strength x 2[2].

Advanced Combat Strength Modifiers:

- Add HQ Combat Support if in range and HQ has combat capability (max 2 HQs Attack; max 1 HQ Defense).
- Out of Supply units Attack strength is x ½ (rounded up).
- Isolated units Attack and Defense Strength x ½ (rounded up).

Notes:

[1] Attacking non-armor/non-mechanized units. N/A for Amphibious Assault.

[2] Motorized units are Leg when defending in Urban/Jungle.

Excess Combat Losses [9.7.1.1]:

If Defender can't satisfy in **red text** columns, reduce attacker losses by one.

If Attacker can't satisfy in any column, reduce defender losses by one.

Efficiency Rating Modifiers:

-1 per SP Overstacked [8.1.1.1]

-X Chemical Weapon (see counter)

-X Nuclear Weapon (see counter)

Multinational Stacking (apply only one):

-2 [NWK2E] PRC/RU w/DPRK or JPN w/ROK [NWK2E GSR 5.1]

-1 [NWK2E] CW w/non-US or JPN w/non-ROK [NWK2E GSR 5.1]

-1 [NWT2E] not CW w/US [NWT2E GSR 6.1]

-1 [NWIP] Any [NWIP GSR 5.1]

-1 [NWP2E] non-NATO [NWP2E GSR 5.2]

-1 [NWV] Any [NWV GSR 5.1]

-1 [NWI] Not US, CW, & FR [NWI GSR 5.1]

Combat Results Key:

Attacker Step Losses / Defender Step Losses

R = Side Retreats

Notes:

* Units retreating from this terrain retreat two hexes.

† Units defending in this terrain or in Cities or Forts *may* voluntarily ignore retreat results on the CRT by passing an ER check (use lowest ER).

Column Shifts:

Standard and Advanced:

- Efficiency: (differential of Attacker's – Defender's Efficiency; max -3/+4)
- Attacks into City or Fortification shift 2 columns left
- Surprise: 1 or 2 column shifts right as dictated by scenario
- Exploitation Combat: 2 column shifts left
- Amphibious Assault: 1 column shift left
- Artillery Brigade support: 1 column shift
  - Max of 2 Arty units may support an Attack
  - Max of 1 Arty unit may support a Defense

Combat Support DRMs:

DRMs of +/- 6 maximum (net) are allowed for Combat Support from Air/Helo/Naval

– DRM for attacking Combat Support

+ DRM for defending Combat Support

Limitations:

A maximum of 2 Helos may support an Attack.

A maximum of 1 Helo may support a Defense.

Any number of Naval units may support any one combat within range.

Standard Air:

A maximum of 4 Air Points may support an Attack.

A maximum of 2 Air Points may support a Defense.

Advanced Air:

A maximum of 2 Air Units may support an Attack.

A maximum of 1 Air Unit may support a Defense.

General DRMs:

-2 Attacking from 5 or 6 hexes
OR -1 Attacking from 3 or 4 hexes

-2 [NWK2E] Attacking from DPRK Tunnel

-1 Mt Inf Attacking in Highland, Highland Woods, Mt, or High Mt

-1 Light Infantry Attacking in non-Flat/non-Flat Woods City terrain

-1 Remainder/Surplus in Initial Odds Calculation [9.2.2/9.2.2.1]

+1 Light Infantry Defending in non-Flat/non-Flat Woods City terrain

+1 each Defender-controlled Installation*, Airfield, and Town in hex

+1 Mt Inf Defending in Highland, Highland Woods, Mt, or High Mt

+1 per additional Formation in Multi-formation attacks (does not apply to NATO) [max +3]

+1 for combined attacks by different nationalities (note: US, UK, CA are same nationality for this DRM)

+1 [NWT2E] Combined attack by PRC Amphibious Army and Marine units in Taiwan (Operational Map)

+1 [NWI] for combined attacks by different IRI branches (IRIGF, IRGC, IRIN)

+2 [NWI] for combined attacks by US/UK/FR and Gulf Allies

+2 [NWK2E/NWT2E/NWIP/NWI] for combined attacks by PRC and any other nationality

* *Not Petroleum Facilities*
