

Solo Bot USSR

Before Play begins, determine a Politburo primary objective and a secondary objective:

<i>Die Roll</i>	Objective
1-2	Conquer Norway
3-4	Conquer Denmark
5-6	Germany & default profile
7-8	Mediterranean
9-10	Strategic Warfare

Guideline Rules:

The primary objective should receive at least 50% of all ops generated for the turn, and the secondary no less than 25%. Each ops spent or decision made should try to advance the objective in the order given from top to bottom. If an objective is on track to complete and nothing remains on the table, go to the secondary instead. If that is also on track, go to 'Germany' by default.

When setting up the game, the primary objective should receive at least 50% of all allocable resources, the secondary 25%.

Use the selected objectives to determine spending of spies on pre-game technical theft with a die roll on the table below and use the first strike prioritisation whenever an FSP is available.

<i>Die Roll</i>	Pre-Game Technology Spending
1-3	Buy no tech
4-6	Buy only the first tech on the primary objective
7-9	Buy all primary objective techs
10	Buy all techs on both objectives

<i>Decision Order</i>	First Strike Points – Spend or Keep?
1	Spend on primary objective
2	Spend on Secondary objective
3	Buy a step of reserve bombers if <4 steps of Backfire & Gear-G are in play
4	If you have enough for nukes, trigger them on a die roll of 7+ but only check this once for at sea and once for use on land – if not used, the Soviets will not use them this game
5	Save to prevent NATO use of nuclear weapons

AI Cards

The Bot always plays its highest value card for ops except for a card that generates first strike points in which case it will play the card to maximise FSPs generated.

Whenever an event would be useful for the given action, use it on a die roll of 6+.

It may be helpful to reduce both sides' hand to 3 cards each to simplify the game.

Task Force Attack		
	When the Bot is instructed to attack a task force, use this process to determine activity	
#	Action to take	Detail
1	Place Poor Detection	Use air by default, if unavailable use a card. Lastly, use a spy
2	F-14 Present?	If the target task force contains US carrier(s) do not attack, otherwise go to step 5
3	Place Good Detection	Use air by default, if unavailable use a card. Lastly, use a spy
4	Are other TFs present in target zone?	If yes and undetected, try to detect them. if yes and poor detected, die roll – 6+ continue otherwise try to improve the detection to good. Die roll is 3+ if F-14's present in the other task force.
5	Attack Decision	Attack the target using the best asset for the job which is available, based on knowledge of the target – submarines take priority over air strikes if the target is heavily defended (multiple carriers or large SAM capabilities) unless the enemy is in range to directly attack Soviet bases, or if enough missiles can be brought to bear to exceed total SAM strength by six or more.

Conquer Norway		
	Objective:	Allocate two amphibs initially or when first available. If there are less than 4 potential troops in or able to land in Norway, all amphibs should be allocated to Norwegian landings
	Aim for 4 troops on the Norway Invasion Track	
	Choice of Landing site	If Scotland is undamaged or enemy TFs are North of the SOSUS line – Bodo, otherwise land at Orland
	First Strike Points	Prioritise Anti-Satellite system
	Pre-Game Technology	Prioritise SAM and ECM technology in that order
#	Action to take	Detail
1	NATO Task Forces North of the SOSUS line?	Resolve using the 'Task force attack' table
2	NATO Task Forces in the North Sea?	Resolve using the 'Task force attack' table
3	Sail Amphibs	Form a TF with amphibs and naval and submarine escort. If multiple are available, form a single large TF on a 6+ otherwise form up smaller groups. Always use maximum force available.
4	Suppress undamaged UK Airfields	Die Roll: 1-6 If not damaged, hit the UK airfields with 3 regiments of Air 7-8 If not damaged, hit the UK airfields with 5 regiments of Air 9-10 Skip this and move down
5	Cover Friendly TFs	With air interceptors & submarines unless already protected
6	Damage Norwegian Base if landing	Only if marked <i>landing</i> , use task force missiles or air to damage the landing site base – this makes landing easier.

Conquer Denmark		
	Objective: Aim for 4 troops on the Danish Invasion Track	Allocate two amphibis initially or when first available. If there are less than 4 potential troops in or able to land in Denmark, all amphibis should be allocated to Danish landings
	First Strike Points	Prioritise Anti-Satellite system
	Pre-Game Technology	Prioritise SAM and Air to air missile technology in that order
#	Action to take	Detail
1	NATO Task Forces North of the SOSUS line?	Resolve using the 'Task force attack' table
2	NATO Task Forces in the Baltic sea?	Resolve using the 'Task force attack' table
3	NATO Task Forces in the North Sea?	Resolve using the 'Task force attack' table
4	Cover Friendly TFs	With air interceptors & submarines unless already protected Double up in the Baltic with maximum air cover
5	Sail Amphibs	Form a TF with amphibis and naval and submarine escort. If multiple are available, form a single large TF on a 6+ otherwise form up smaller groups. Always use maximum force available.
6	Suppress undamaged German airfields	Die Roll: 1-6 If not damaged, hit the Ger airfields with 3 regiments of Air 7-8 If not damaged, hit the Ger airfields with 5 regiments of Air 9-10 Skip this and move down
7	Hunt Enemy Subs in the Baltic sea	Using own submarines and air, aim to reduce threat to friendly task forces

Germany & Default Profile – 'Cautious Bot'		
	Objective: Place 3 Hits on every convoy to N. Europe	Only over-kill if the target is exposed, lightly defended or isolated. Use diesel submarines wherever possible and maintain the better nuclear boats for the later game. Ignore US carriers for the most.
		Use clusterguard cards exclusively to help maintain a first strike capability.
	First Strike Points	Prioritise reserves to maintain naval air strength
	Pre-Game Technology	Prioritise ASMs and Torpedo technology in that order
#	Action to take	Detail
1	NATO Task Forces North of the SOSUS line?	Resolve using the 'Task force attack' table, releasing any and all assets including nuclear boats to destroy
2	NATO Task Force in East 2 or East 3 or East 5	Resolve using the 'Task force attack' table
3	NATO Task force in Mid 3, Mid 5 or Mid 8-9	Resolve using the 'Task force attack' table, but the aim is to detect and track – only attacking if the target is weak or exposed
4	Less than 4 RORSATs aloft?	Launch a RORSAT into a zone to the right of a NATO TF in the Atlantic, selecting randomly if several exist. Do this only once per day, then skip
5	Surge submarines	Aim to use diesel submarines first, keeping nuclear boats in reserve for the most part. Target location is East-3 & Mid-5, out of range of most NATO ASW assets.
6	Mine Ports	Whenever possible, mine the French ports
7	Maintain a first strike presence	Move Yankees on-station with escorts, wherever possible use bad weather to hide

Mediterranean		
	Objective: Place 10 Hits on every convoy to S. Europe	Hunt and destroy the convoys to the Mediterranean. Use diesel submarines, but also allocate nuclear boats as they can make the trip South. Target engagement zone is around East 2. Further attacks can be made from Med-based assets as needed.
		The Bot should aim to hit the convoys and only attack carrier groups if the odds are favourable, but with overwhelming firepower if it does attack, preferably with nuclear weapons.
	First Strike Points	Prioritise nuclear weapons at sea
	Pre-Game Technology	Prioritise ASMs and Torpedo technology in that order
#	Action to take	Detail
1	NATO Task Forces North of the SOSUS line?	Resolve using the 'Task force attack' table
2	NATO TF in or East of Mid 1 or Mid 2 ?	Resolve using the 'Task force attack' table
3	Surge submarines	Mix of diesel and nuclear boats, heading for region of Mid 3 as the best 'kill zone'
4	Mine Ports	Whenever possible, mine the Southern French & Italian ports
6	Maintain a first strike presence	Move Yankees on-station with escorts, wherever possible use bad weather to hide

Strategic Warfare 'Crazy Ivan'		
	Objective: Hunt NATO SSBNs and carrier groups use battlefield nukes	Prioritise attacks on US carriers, attacking with maximum firepower and burning every asset available to succeed. Use spies to gain the SSBN Hunt marker and subs to kill them. Get to nuclear release as quickly as possible.
	First Strike Points	Prioritise battlefield nuclear weapons, then sea nuclear weapons
	Pre-Game Technology	Prioritise Torpedo & air to air missile technology in that order
#	Action to take	Detail
1	NATO Task Forces North of the SOSUS line?	Resolve using the 'Task force attack' table, releasing any and all assets including nuclear boats to destroy
2	NATO Task Force in East 2 or East 3 or East 5	Resolve using the 'Task force attack' table
3	Surge submarines	Use nuclear boats first, and hunt NATO SSBNs whenever in an allowable location
4	Maintain a first strike presence	Move Yankees on-station with escorts, wherever possible use bad weather to hide
5	Move SSBNs under Ice	Maintain at least 4 steps under the arctic with escorts
6	Defend the boomers	Maintain 6 steps or more of submarines in the bastion and escort SSBNs under the ice. Respond aggressively to NATO incursion
