Submarines

Diesels Ⓢ move 1, Nuclear moves 2

A Soviet SSBN may take a nuclear sub with it, both spent.

Ⓢ subs move or attack or 'on patrol'. If moving, move 2.

- 1 sub move and attack
- 1 sub attack and then move
- 1 sub move and go 'on patrol'
- 1 nuclear sub fast move 3 zones
(Optional: Noise - except for Akula, Oscar, Alfa, Sierra)
- 2-3 subs missile coordinate - all move to same zone and perform a missile attack.

Air Units

- 1 Maritime Patrol fly and attack or detect TF
If a detection is placed or upgraded, active player may then play one further action to attack a detected TF.
- 1 MP / Fighter fly and go 'on patrol'.
- 1+ Strike units fly an air strike. Fighters & tankers may fly for free and fighters may escort part-way.

Ships

- Form a new TF: **Cost 2**
- Move ships between TFs in the same zone: **Cost 1**
- Fire missiles with a TF: **Cost 1**
Automatic vs. facilities, may require a roll vs other TFs.

Miscellaneous

- Repair a facility - remove a hit marker: **Cost 2**
Requires a 5+ roll if the damage level will change.
- De-Mine a port: **Cost 2**
Requires a 5+ if undamaged facility, otherwise 7+.
- Launch or move RORSAT: **Cost 2**
Destroyed on roll of a 1. Cannot stack until 4 aloft.
- NATO May attack Cuba (See 21.5): **Cost 6**
- Pass, if you have less ops than the enemy.

Use when Active - not an action

- Use a First Strike Point to buy an effect.
- Use a Soviet Spy.
- Play an event on either of your OPS cards & mark used.
- Play an event on a card in your hand at +2 cost.
- Return an 'on-patrol' air unit to its base, fresh.

Use At Any Time - not an action

- Play a Reaction event from a card in your hand.
- On patrol units may attack enemy units moving through their zone - fighters vs air; MP/Subs vs subs; MP via Task Force detection; subs via ASW vs. Task Forces.
- CAP may roll to attack air units attacking their base. Carriers defend all bases and TFs in their Sea Zone.
- Hydrophone detection when enemy subs move across.
- Draw a card if you have less than 3 cards in hand.
- Use a Soviet spy for First Strike evasion.

Actions

Each unit costs one OPS unless stated

OPS Track Events - (Trigger after both players move to/past)

Fast

Fast Task Forces may move (not perform ASW) one Sea Zone. Ignore in day two. Resolve as per the ships event ignoring 2 & 4 and applying only to fast groups & zones they occupy.

Ships

- 1) All TFs may move one Sea Zone, resolve ASW, mark 'landing' or land if already marked.
Roll 1 detection against any marked 'landing'.
Perform movement in order of detection status.
NATO may dissolve TFs. Submarines may join a TF if not spent or 'on-patrol'. 'On Patrol' units may react to enemy movement. 'On Patrol' air may move with a moving TF (check range).
- 2) Degrade detections not placed in step 1 (Fast Ignore)
- 3) RORSATs search
- 4) Air unit spent marker removal except for MP (Fast ignore)
- 5) Resolve fighter vs. fighter combat due to movement of TF
- 6) Intrinsic detection units are attacked and then search

Repair

Remove one hit from each damaged facility.

Next Day

Both play 2nd card (Soviet first) then continue the game.

Turn Sequence

- 1) Convoy placement (one in US & check for Med Convoy)
- 2) Reinforcements
- 3) Operations
 - a) Soviet card
 - b) NATO card
 - c) Soviet first action
 - d) Igo-Ugo actions; Fast, Ships, Repair, Next Day may trigger
- 4) End of turn
 - a) On patrol units may return to base
RTB all air if both sides fighters occupy same zone
 - b) Remove all 'spent' & choose to remove 'on patrol'
 - c) Invasions
Resolve Denmark & Norway tracks - 2 advances possible
Increase Danish mining if no amph landing
Danish strait de-mining & Norwegian surrender
 - d) War Track changes / Soviet advances - always 1 advance
NATO nuclear weapon use
Capture facilities
Remove submarines.
Remove 3 hits on ALL tracks
 - e) If a First Strike turn, +1 FSP if 6 payload in FS zones
 - f) Remove all weather & roll for new weather
 - g) NATO may hold 2, Soviet 1, then draw to 5 cards
 - h) Move the Turn marker
 - i) Roll for Soviet ASAT point removal. 6+ removes 1 point

Attacks on and by Submarines

Blue

Copyright © 2019, Compass Games, LLC

Anti-Submarine Warfare 17.8

Roll anti-submarine warfare dice (minimum=0 die) 17.8

Die roll + Tactical Value = kills allowed

Torpedo Tech - Soviet nuclear submarines Tactical Value = 1
(Optional: MP & sub - sub rolls with +2 dice. Both spent)

Select any submarine targets with D value equal or lower.

Defender selects first target killed, attacker selects others.

N 1 (NATO rolling) One step loss in the Bastion (one/roll)

N10

- Any submarine hit by the attacker or...
- TF detected, may ignore all other dice and attack it or...
- Soviet nuclear submarine take or use SSBN Hunting marker, not in Barents or Norwegian Seas (North 5-6 & 7-8) or Black or Baltic Seas.

Any double <10 Any Soviet sub rolling: kill 1 step

Arctic -1 die; All subs 6+ save or upgrade 6+ save to 4+. Ignore rocket torpedoes

Bad Weather -1 die; -2 dice for MP units

Hydrophone Interruption +1 die or roll 1 die and not spent
(Optional: always one die, not spent, if submarine)

Subs marked (N) Can not be killed by MP unless an N10

'Save' subs Ignore any hit on a roll of 6+

N: means a natural roll

Anti-Submarine Warfare by Task Forces

A Task Force may search for submarines instead of moving.

Use the TF ASW values and dice totals from the submarine vs Task Force section (immediately right) but ignore the modifier for a fast TF. Place a Poor detection on the TF after its search.

If the TF rolls any two N1-2 results instead place a Good detection on the TF after its search.

Resolve using the Anti-Submarine Warfare process. Ships with rocket torpedoes (R) kill on doubles <10

(N) units are hit on N10 only.

N: means a natural roll

Effect of hits by Submarines

Convoys Increase the hit marker by 1

Capital Ship See Capital Ship Damage Procedure

Other unit Cause a step loss

Hit Results

Capital Ships: Carriers & (B) (H) (L)

Hit

Non-capital ship without (P) step loss, chosen by attacker.

Amph/Convoy/(P)

Non-capital ship step loss or hit on Amph/Convoy, attacker selects first hit & others to Convoys or allows defender to allocate after the first.

Submarine Launched Missiles vs. Task Force

Roll 1 die, 2 dice if 'Good detection' & use the best roll.

Roll of 1-3 No attack

Roll of 4-7 Long Range attack
(Optional: no attack for Charlie II)

Roll of 8-9 Short Range attack
(gives a bonus effect vs. SAMs)

Roll of 10 Short Range attack and submarine vs Task Force

-2 DRM if diesel submarine and target TF is Fast

-2 DRM for missile coordination per unit after the 1st
(example: -2 DRM for 2 units, -4 DRM for 3 units)

Submarines vs. Task Force

Roll anti-surface dice (Minimum=1)

DR + Tactical Value = results on sub vs TF table

Good Detection +1 die

Bad Weather -1 die

Target TF is Fast -1 die; -2 dice if diesel sub attacking

Submarine Attack Results

Die Roll **Result**

1-5

6

Hit & (T)

7-9

Amph, Convoy or (P)

10+

2 Convoy (once) & (T)

N10

Hit vs any or as 10

N: means a natural roll

Set dice to the side for possible defender cancellation.

(T) submarines rolling this result may move one row down, alter the dice. Dice may also be used to kill escort submarines. If no hits, combat ends.

If US or UK nuclear sub, Torpedo tech - Soviets can also use

A double 1-6 may immediately resolve one hit.

A double 7-10 may immediately resolve one PM/Amph/Con.

Task Force ASW

Unit **Value**

Submarine ASW x3

Carrier +2 ; +0 in Bad Weather

'On Patrol' MP ASW ; 1 in Bad Weather

Ship ASW

Task Force Defense:

Calculate ASW total & then roll the ASW dice.

Task Force ASW Total

18+

4+1

Any Double: TF owner may alter one die to an 8 and discard the other if any ships have (R) rocket torpedoes and it is not Bad Weather.

Each 8+: TF owner may remove one submarine attack die of their choice. DR + tactical value = kills allowed. (N) subs killed on N10

Up one row in Bad Weather

Up one row if TF is fast

Task Forces: Detection, Missile Attacks and Damage Blue

Copyright © 2019, Compass Games, LLC

Detection of TFs (by MP, RORSAT, Tattletale) 17.10

Roll number of TF detection dice.
Resolve in order of lowest die to highest die.

US CV detecting	2 dice each
other CV detecting	1 die each
>2 enemy TF in the zone	+1 die per TF over 2
Soviet anti-satellite usage	-1 DRM per FSP

Die Roll	TF Detection
1-2	No Effect
3-5	Poor Detection. May upgrade any Poor detection to Good. Placed by TF owner <i>unless upgrading</i> .
6-8	Poor Detection. May upgrade any Poor detection to Good. Placed by rolling player.
9-10	Good Detection placed by rolling player. Change to result '6' in Bad Weather. RORSAT change to '1'

Detection Results

Poor Detection Reveal Amph, Convoys, 1 FTR of each type
Good Detection Reveal entire group

Missile Attacks by Task Forces vs. Task Forces

Soviet Task Force Missile Attack

- May fire yellow & black vs NATO Good detection TF in same zone, or vs Poor detected TF if Soviet TF is fast on 6+.
- If the target TF has F-14's, roll 1 die if the attacking Soviet TF is poor or 2 dice if good detected & remove that number of missiles on 1's & 2's.
- White & red missiles by card only. Except in Baltic Sea - may fire vs Good detection TF in same zone. 1 ship only.
- Missiles of different colors can be attacked at the NATO players option but declare before the dice are rolled.

NATO Task Force Missile Attack

- Anti-ship missiles by card event only. Except in Baltic Sea - may fire vs Good detection TF in same zone. 1 ship only.

Capital Ship Damage

Roll the number of dice indicated, and compare to the table

Damage Dice to roll based on Weapon Used 14.1

No. of Dice	Weapon Used
1	NATO missile, Soviet white missile from a ship Soviet red missile, Tomahawk missile (card).
2	Soviet yellow, black or submarine white missile Soviet or NATO torpedo.
3	Soviet torpedo from ① submarine.
+1 die	Already damaged
+1 die	Each additional hit taken at the same time.

Roll the number of dice indicated, and compare to the table.

Target	Damaged	Sunk
⑧ Big	All dice 1-7	Any 8-10
⑨ Huge	All dice 1-9	Any 10

Missiles Attacks against Task Forces

SAM Resolution

A TF may fire with more SAMs than incoming missiles depending on the number of incoming missiles as follows

Incoming Missiles	SAM shots allowed
1-5	# Incoming Missiles +1
6-10	# Incoming Missiles +2
11-15	# Incoming Missiles +3
16-20	# Incoming Missiles +4
21-25	# Incoming Missiles +5
26-30	# Incoming Missiles +6
31-35	# Incoming Missiles +7
36-40	# Incoming Missiles +8

TF owner rolls 1 dice per SAM point, applying all DRM's

DR 1-2	Miss
DR 3-8	1 Hit
DR 9-10	2 Hits

DRMs Soviet red & yellow missiles incoming: -2
NATO missiles incoming: -1
Bad Weather: -1
Shooting at a non-yellow sub short range attack: -2
White submarine-launched missiles: +2
SAM Technology - Soviet SAMs rolling: +1

Incoming Missile Resolution 17.17

Roll one die per 2 missiles remaining, and a single die for an odd remaining missile. Apply DRM's

2 Missiles		1 Missile	
DR 1-7	1 Hit	DR 1-2	Miss
DR 8-10	2 Hits	DR 3-10	1 Hit
DRMs	Good Detection: +1 Bad Weather: -1		

Missile Hit Selection

Roll two dice: Any N9 / N10 **first** hit allocated by attacker.
(Optional: Soviet yellow missiles roll three dice)

NATO attacker allocates every 2nd hit (2-4-6-8-10-12)

Soviet attacker allocates every 3rd hit (3-6-9-12-15)

Missile Technology - Soviets may resolve as NATO.

N: means a natural roll

Effect of Hits Caused

Each hit causes one step loss, causes 2 hits to convoys/amph or causes a damage roll against capital ships.

Damaged Carriers (CVs)

Half of all air must roll & take a step loss on a 6+.
Do not count as a carrier for sub vs Task Force attacks.
No intrinsic detection capability.
Only CAP may fly, with a modifier.
May immediately break off & form their own TF with escorts from previous force, allowing them to retire.

Attacks by Fighters (CAP & Interception)

Brown

Copyright © 2019, Compass Games, LLC

Air Units-Transit to a Zone

- 1) Check the route TO (but not back from) the target for interceptions and resolve each in turn.
- 2) Resolve any interception in the target zone.
- 3) Resolve CAP by eligible units protecting the attacked target

Air Units Intercepted when:

- Entering a zone with a fighter unit on patrol.
- **Leaving** a zone with an enemy carrier.
- **Overflying Denmark or Turkey**. The War Track fighter symbols show the number of dice to roll.

CAP may roll to attack when:

- A strike attacks a location being protected.
- Carrier based fighters defend **every** Task Force in the Sea Zone and **every** land facility adjacent to the zone (the carrier does not have to be a target). Land based fighters protect land bases in **their** land area (but not Task Forces out at sea).
- An air unit enters a Sea Zone with carrier based fighters prior to rolling to complete whatever mission it was sent to perform (eg: MP aircraft are attacked by CAP prior to attempting Task Force detection).

Fighter Combat vs. Maritime Patrol (MP) 17.5

Includes vs Intrinsic carrier MP

Roll air-to-air dice -2 (min=1) with one fresh fighter

Die roll + Tactical Value = kills allowed

9+ vs. plane -1 search ~~per~~ die

N10 vs. plane Step loss and no search

6+ vs. helo -1 search ~~per~~ die

N8-10 vs. helo Step loss and no search

Air to Air Technology - Soviet +1 DRM

Intrinsic MPs are always helos except for US carriers

N: means a natural roll

Escorted Air Strikes

- The defending player may roll with one defending fighter for each strike aircraft or each escorting fighter.
- All damage must be allocated to escorting fighters first except for N10 results.
- Any strike air killed by fighters in an escorted mission does not attack.

Fighters vs. Strike Aircraft (CAP & Intercept) 17.7

Roll all fighter dice with one fighter for each strike unit.
CAP must come from target TF unless better fighters available
of dice to roll is modified per unit rolling: (min = 1 die)
DR + Tactical Value = kills allowed.

Intercepting Fighter unit 'On Patrol' -1 die

CAP 'Spent' -2 dice

Detected by Interceptors +1 die

Base damage light -1 die

Base damage heavy 1 die **only**

Damaged Carrier (CV) -1 die

Air to Air Technology - Soviet +1 DRM (Optional: F-14 missile defence)

N10 CAP kill before launch

N9 As per N10 if strike bombing

N1-2 with F-14 rolling kill this number of missiles

Interceptors

Killing or failing to kill by one pip causes the strike to count as 'detected by interceptors' from then on.
An intercepted strike may abort after all fighters in the Sea Zone roll.

Saves Against CAP Kills

All kills by CAP (not by interceptors) may be saved based on the detection status of the base from which the fighter flew.

Good detection on shooting carrier CAP 6+

CAP from any airfield 6+

Poor detection on shooting carrier CAP and not the strike target 8+

Fighters vs. Fighters (and escorted air strikes)

Roll all fighter dice for both sides (max 1 v 1) (minimum 1 die)
DR + tactical value = kills allowed

Intercepting Fighter unit 'On Patrol' -1 die

CAP 'Spent' -2 dice

Detected by Interceptors +1 die

Damaged Carrier (CV) *or light damage* -1 die

Air to Air Technology - Soviet +1 DRM

N10 (Defending Player) Step loss on Strike unit

also N9 if strike is using bombs

All step losses are selected by the rolling player. Fighters must be killed before strike units can be selected (except N10).

N: means a natural roll

Attacking Land Targets

Brown

Copyright © 2019, Compass Games, LLC

Air Units Bombing Land Targets 17.20

1 dice per step, US CAGS get 1 free SEAD die per 2 CAGs.

SAM Supression (SEAD)

Allocate dice to SEAD. These dice do not bomb.

Die Roll	Result
1-2	Miss, No Effect
3-5	-1 SAM value, <i>temporary</i>
6-8	-1 SAM value, place hit
9-10	-2 SAM value, place 2 hits

SAM Attack

Roll a die per remaining SAM before the attackers bomb:

6+	Ignore 1 bombing die
=>D	1 attacking step loss and ignore 1 bombing die

SAM Technology - Soviet +1 DRM

Bombing (air-to-ground)

Die Roll	Result
1-3	Miss
4-8	1 hit, 1 kill (collateral)
9-10	2 hits, 2 kills (collateral)

DRM	Cause
+1	If some range to the target not used
-1	Bad Weather

Place the number of hits scored on each facility. *Maximum of 5.*

Collateral Damage

- 'Kills' cause damage to units stationed at the facility.
- Even kills are allocated by defender, odd by attacker.
- **Soviet Kola, Baltic, Black Sea:** NATO may force fighter casualties or Bear, Badger, Backfire (Soviet selects type).
- Either side may cause one RORSAT loss (6+ Soviet selects) returning 3 turns from the current turn.

The Kola Peninsula

For each hit caused to the Kola Peninsula, the Soviet player takes one First Strike Point.

Facility Damage - Effects cumulative

Type	Damage Effects
Airbase (Light)	No air may fly, return to base on patrol interceptors & MP units and mark spent. Also applies a CAP modifier.
Airbase (Heavy)	No air may fly. All CAP is reduced to one die per unit. Do not remove spent markers on air units when ships move or at turn end.
Port (Light)	+1 hit to Convoys/Amphs arriving for delay. Subs moving from this port cost 2 OPS each. Applies -2 mine clearance penalty.
Port (Heavy)	+2 hits to Convoys/Amphs arriving for delay (<i>instead of +1</i>). +1 OPS to form a TF at this port.

Cruise Missile Attacks Vs. Land Targets 17.21

Soviet missiles (ship black & yellow, all submarine, all air).

No. of Missiles	No. of Dice
1-3	2 dice, keep lowest
4-7	1 die
8-12	2 dice
13+	3 dice

Soviet Green background missiles

May fly 2 zones to the target, roll # dice on counter(s).

NATO Green background missiles

May fly 1 zone to the target, roll # dice on counter(s).

SAM Supression (SEAD)

Allocate dice to SEAD. These dice do not attack.

Die Roll	Result
1-2	Miss, No Effect
3-5	-1 SAM value, <i>temporary</i>
6-8	-1 SAM value, place hit
9-10	-2 SAM value, place 2 hits

SAM Attack

Roll a die per remaining SAM before cruise missiles attack:

Die Roll	Result
1-5	Miss, No Effect
6-7	Degrade one die, applying -2 DRM to attack
8-10	Shoot down one cruise missile point

SAM Technology - Soviet +1 DRM

Cruise Missile Attack

Roll a die per remaining cruise missile point:

Die Roll	Result	DRM	Cause
1-3	Miss	-1	Attacking Troops
4-6	1 hit	-1	Bad Weather
7-9	1 hit, 1 kill		
10	2 hits, 2 kills		

Place the number of hits scored on each facility. *Maximum of 5.*

Striking Soviet Troops (Europe South War Track, Norway, Denmark) 17.24

Roll escort fighter air to air attacks: DR + Tactical Value needing 8+ The number of hits gives the # Soviet attacks:

Hits	Result
0-1	2 attacks vs each striking air unit
2-3	1 attack vs each striking air unit
4+	1 attack in total

Resolve each Soviet attack as follows:

Die	Result
6+	Ignores 1 bombing die
=>D	1 attacking step loss and ignore that die
N10	Soviet may choose to kill 1 step of fighters

Air-to-Air Technology - Soviet +1 DRM

Port Capabilities

Minor Port	May rearm one submarine unit per turn May only rearm surface units of that nation
Major Port	May rearm any number of submarine units May rearm surface units

Convoys, War Tracks, Mines, Repairing Ships and Nuclear Weapons

Grey

Copyright © 2019, Compass Games, LLC

Convoys

Hits	Result
0-2	Full Convoy (cancel Soviet advance)
3-4	Partial Convoy (two combine to a full Convoy)
5-6	—
7-9	Convoy Massacre
10	Additional Convoy Massacre & remove Convoy

Mines

Cause a hit on each 1-2 rolled. Odd hits to Convoy/Amph

Light	2 dice
Heavy	4 dice

Port Damage

Light Damage	+1 hit each Convoy
Heavy Damage	+2 hits each Convoy

Delivery to these ports can increase a Convoys worth:

Delivery to:	Effects
Belgian Port	Treat 5 hits as a Partial Convoy
Taranto	Treat 5 hits as a Partial Convoy
Turkish Port	Treat 5 & 6 hits as a Partial Convoy

Convoy Massacres

- One marker:** No effect
- Two markers:** +2 Soviet OPS
- Three markers:** +1 NATO losses and return all markers.

Europe South & Norway/Denmark War Tracks

3 hits on troops prevents one advance on the War Track this turn. Remove 3 hits (only) at the end of each turn.

CAPTOR Mines

When a submarine moves into or through the zone, roll dice on counter as an ASW attack.

- Bad Weather: -1 die. Minimum = 0 dice
- N1=flip/remove mines

Port Mines

Submarine enter/leave: 1 die light, 2 dice heavy
Hit on 1-2. -1 die if  or  minimum = 0 dice
TF enter/leave: 2 dice light, 4 dice heavy
Hit on 1-2. Odd hits to Convoy/Amph, others by TF owner

Mined Danish Straits: Units are hit on rolls of 1-4

Nuclear Weapons at Sea

USSR submarines

USSR nuclear submarine taking a step loss caused by a NATO submarine's **N10** roll also causes a step loss to the attacking submarine

Attacking surface ships with nuclear torpedoes

Soviet submarine hits have the following effects:

Convoys & amphs: Mark two hits for the first 7-9 scored

Non-capital ships: No change

Capital ships: Destroyed or step loss if multiple ships

Attacking surface ships with Anti-Ship Missiles

Every 3rd missile through the SAMs is nuclear. Resolve nukes first, then resolve remaining non-nuclear missiles.

Nuclear weapons automatically hit something.

Roll a die, on an 8+ the Soviet player allocates it, otherwise the NATO player allocates it.

Any hit kills the target counter entirely, except for a Convoy or Amph unit which takes three hits.

Soviet SAM Defenses

If the Soviet SAM level of a target is at least two, treat it as being worth +2 more than its current value against air units only (not against cruise missiles).

NATO Losses

- 6 Loss Points gives the Soviet player one Hammer & Sickle
- 1 for a damaged US carrier (if not already damaged)
- 2 for a sunk US carrier
- +1 if the damaging/sinking is North of the SOSUS line
- 1 for every 3rd Convoy Massacre marker earned

SAM Ammo ①

Tico VLS Fire 2-4 SAMS, mark '2-4 fired' SAM value now 4. If fired 5+ mark no ammo.

Kirov/Kalinin has 2 volleys total. 1 volley is 2+ shots.

When out Kirov is SAM 1, Kalinin is SAM 2.

Repairing Capital Ships

Roll when the ship arrives at a friendly major port and place on the Turn Track the indicated number of turns from the current turn.

Die Roll	Result
1-3	5 Turns
4-7	4 Turns
8-10	3 Turns

Soviet Specific Rules - Spies, Invasions, First Strike Points, Technology

Copyright © 2019, Compass Games, LLC

NATO Boomer Hunting

The USSR player may claim the 'SSBN Hunting' marker

- Via spy action
- By using a nuclear submarine **N10** ASW roll

The USSR player may spend the 'SSBN Hunting' marker

- By using a nuclear submarine **N10** ASW roll

Roll on the following table with 1 die.

add the Tactical Value of the attacking submarine.

Die Roll Result

- | Die Roll | Result |
|----------|--|
| 1-3 | Counter Attack: Soviet unit takes a step loss |
| 4-7 | Near Miss: Soviet receives 1 FSP |
| 8-10 | Sunk: Soviet receives 1 FSP & removes 3 sunk Soviet SSBN Payload value from the current total OR takes an extra FSP. |

Evasion 6.7

Soviet Spies

- Place a Poor detection on any Task Force.
- Take the SSBN Hunting marker.
- Re-roll up to three Anti-Submarine Warfare dice rolled by any Soviet unit (one re-roll per unit maximum).
- Automatically succeed on all First Strike submarine evasion rolls in a single zone - even after rolling.

First Strike Points

- Anti-Satellite: place 1-2 in ASAT system boxes. While present, prevents NATO play of 'Whitecloud' and 'Snoopers detect raid' and applies DRM to NATO detection. Also, if two FSP's are present, removes one OPS from each NATO card. Remove one at the end of the turn on a 6+.
- Take a step from the strategic reserve - 1 point/step.
- Trigger the use of nuclear weapons at sea - 3 points.
- Use battlefield nuclear weapons - 5 points (move a front 2 boxes, reducing victory locations to 1 H&S. Move Soviet stability 1 right. Prevents NATO use of nuclear weapons).
- Prevent NATO use of battlefield nuclear weapons when entering the Ruhr space - 2 points or 4 if chemicals used.

Soviet First Strike Submarines

Any SSBN in or adjacent to a First Strike zone may roll to evade when an Anti-Submarine Warfare attack is declared. On a 6+ (8+ if spent) move the submarine and one non-diesel escort to an adjacent zone. The attacker is spent regardless of targets. The SSBN & escort are spent.

Amphibious Invasions

Number of dice available to NATO (minimum = 1)

Location	Turn 1-2	Turn 3-4	Turn 5+
Norway	4	3	2

-1 die if invading Bodo

Denmark	6	4	3
---------	---	---	---

DRMs -2 dice if Soviet troops ashore in this location
-1 dice if base at landing site is damaged

Each die causes a hit to an amph but can be cancelled if the Soviet player has the relevant capabilities within the Task Force. No capability can be counted more than once.

Roll all dice and resolve starting with the lowest value.

Die Roll Result

- | Die Roll | Result |
|----------|--|
| 1-3 | FAC: Cancel by expending 3 white (not vs Denmark) or red missiles. For each not cancelled, change the die to a 6 and resolve later. |
| 4-5 | Ships: Cancel by expending 2 black/yellow missiles. For each not cancelled, change the die to a 6 and resolve later. |
| 6-8 | Missile/Air Strike: Cancel by expending 4 SAMs. Cancel one if TF is not marked with a Good detection. |
| 9 | Mines: Cancel by taking a step loss on any ship. |
| 10 | Guns: Cancel one if Sverdlov is present. |

Landing Troops

NATO landing at Oslo land only one troop unless Soviets are in the Orland box.

Landing with 0-2 hits Place 2 Troops

Landing with 3-4 hits Place 1 Troop

Soviet landing at least 1 Troop in Bodo/Orland may place War marker in that box & roll for facility capture. Soviets landing in Orland - Bodo is also captured (heavy damage).

Capturing Facilities

Heavily damaged by default.

Roll 1 dice per troop landed. Roll of 8+ to reduce damage by one level, place hit markers to match the facility damage box. May rebase 2 fighters & 2 strike. Mark strike units spent.

Soviet Technology

SAMs: +1 DRM all SAM rolls - land and sea.

ASMs: Resolve missile hit selection as NATO, allocating every 2nd hit instead of every 3rd hit.

Torpedoes: All Soviet non-diesel submarines +1 tactical vs submarines, & Soviets may use Harpoon(ski).

ECM: Backfire & Bear-G receive 8+ save when airborne vs. any step loss. Ignore if a better save already applies.

Air-to-Air missiles: +1 DRM on all air to air rolls
