

Blue Water Navy. Card clarifications.

Soviet cards

#3/53 Stealthy Approach, Reaction Event

Play as soon as the attack is declared, not after ASW roll.

#4 KGB Assassinations, Operations Event

R#13. This card is used immediately when placed down on the table by the Soviet player. Reduce the Soviet spies track by one, without rolling. NATO discards highest valued card (selecting if a tie). NATO misses the opportunity this day to play a card for OPS and instead receives 6 OPS. NATO may still play cards using all the normal rules (reactions, +2 cards from hand), NATO just doesn't choose a card for its OPS value. This event can not be cancelled by NATO card #12 "Intelligence Agencies".

#7 Naval Aviation Deception Tactics, Operations Event

Total cost to play the card is 2 plus cost of the strike. NATO CAP/Interceptors only shot at missile carrying regiment and ignoring the regiment not carrying munitions (decoy). Thus, if only one Striker survives (the decoy) the strike can not proceed.

#8/13/16/19/50 Double Hull/Clusterguard, Reaction Event

It cancels one step loss. First roll for save, if there is one.

#9 Fast Attack Escort, Reaction Event

Always a minimum of 1 NATO die in defense of amphibious landing.

#10/50 Surge, Operations Event

As though you spent 4 ops to activate submarines. Cost included in the card.

#15/19 Spetsnaz Raid, Operations Event

Inflict step loss to NATO air unit only.

#21 SOSUS Sabotage, Operations Event

"For this card play" means during the day that this event is used. For example one can play SOSUS Sabotage on day one but not trigger the event until day two. When you do this, it lasts all of day two, but you lost the element of surprise.

#22/26/27/29 First Strike, Operations Event

CL#4. Play before spending any points" has been rephrased by the designer to "play before spending any points from this card". Thus, it can be used on day two but has to be before any points are spent and it can not be used the +2 cost to play it cos then you would have to spend ops to play it. A maximum of 2 FSP can be achieved using this event.

#23/30 Attack while Forming Up, Reaction Event

Also applies when a Task Force adding ships from an adjacent port. Please note that when adding ships from a port to a task force already at sea, the task force loses its next chance to move. Use a spare 'formed TF' marker as an indicator for this. No modifier for detection status of the Task Force is applied.

#25/34 Submarine Pairing, Reaction Event

Kill equals step loss.

#28 Chemical Strikes, Operations Event

Move one box in ALL theatres (incl Norway, Denmark, Northern, Southern) where Soviet have an Army marker.

#33 Strike Supply Ports, Operations Event

Three hits on each port.

#35/51 ASM Attack, Reaction Event

Can not be combined with any other missile attack.

#39 Paratroops, Operations Event

Keflavik always heavily damaged, do not roll for reduction of damage. This is in contrast to amphibious landing if which case following applies: If you landed two troops, you roll two dice. If you miss with both, mark it heavily damaged and 2 hits (because 2 is enough to heavily damage the Icelandic bases). If you succeed with one, mark it light & 1 hit. If you get both of them, the troops made some brilliant secret landing and capture the facility intact.

If either Crete or Malta is chosen use one of the Soviet airbase counters. The card doesn't specify any damage, so they are taken in tact and start with no damage. The Soviet airbase counters hits should be 1/2. Paratroop drop can not be intercepted. Soviet airbase in Malta (after airdrop) is located in Med 5-6 and is immediately operational.

#40 Cubans Special Ops, Operations Event

If Cuba is active, Puerto Rico is bombed and the card is removed from the deck.

If Cuba is inactive (default situation), a fresh unit in Puerto Rico is spent.

The cost is 0 in both cases.

#42 Strategic Strike, Operations Event

Has to trace from somewhere, but with unlimited range. AS15's can only be shot down by SAM. In 85+ one can choose between black anti-ship missiles (range 0) and green land missiles (range 2). Tu95MS Bear is a two-step unit with 3 black missiles loaded on the back side and 1 green missile loaded on the back side, respectively.

#44/49 Determined Attack, Reaction Event

The attacking submarine still receive hits. They do not remove rolled dice. Only natural 8-10 are ignored not a 7 with a tactical modifier.

#46 Strike UK Early Warning, Operations Event

CL#10. The new targets go into the UK airfield box, and fly to that location to hit them (for adjacency purposes etc). Can't split two hits from one die. No collateral damage. Does not cause airfield damage per se.

#53 Category "C" Division, Operations Event

Only moving one of the European war tracks (Northern or Southern) requires the 6+.

#54 Strike US Targets, Operations Event

It specifies the location of Cape Canaveral target in Florida and Early Warning Radars target in Washington. Once played, get the counters and place them on the mentioned locations. Once the targets are placed, they can be attacked the same way you would attack a facility. Use range rules as usual. They remain in the game till destroyed. The card only gives you the targets, it does not provide a free strike against them.

NATO cards

#1/34 Minesweepers, Operation Event

Degrade Soviet port mines.

#3/25 Distant Support, Reaction Event

CL#12. Treat the F-14 as CAP. The US Carrier must be adjacent to the air strike.

#4 Norway Resists, Operation Event

Hits are removed as usual from the Invasion track.

#8/13 Replacement Air Wings, Operation Event

Fully restore (even destroyed and removed from play before) two different entire Air Wings/Groups. Thus could potentially mean in total four air units. Return to carrier if possible, otherwise in the meantime to a local airfield.

#10/18 Nuclear Fear, Operation Event

Move Soviet Stability one box towards coup.

#12 Intelligence Agencies, Reaction Event

Can not cancel Soviet card "4 "KGB Assassinations".

#16 SURTASS, Operations Event

Can be air unit or submarine, patrolling or unspent, but not any spent unit.

#16/40 Nixie, Reaction Event

Even protects against nuclear torpedos but as written not against heavyweight torpedoes.

#17 Carriers Support Germany, Operations Event

Lasts until next day, not a one-time attack. Use the procedure written in 17.24 Striking Soviet Troop Markers.

#21/22 Tomahawk Anti-ship Missile, Operation Event

Consider as standard, regular long-range attack without modification. However, modify for NATO weapons.

#21/50 Air Patrols, Reaction Event

Only applies to interceptors, not CAP.

#23 Special Forces, Operation Event

This attack is not modified for bad weather, it is a straight roll.

#27/49 Fighters to Norway/Denmark, Operations Event

Grounded in this context means F-14's on the turn track as a consequence of their carrier being repaired.

#31/53 Friendly Fire, Reaction Event

Saved hits do not count as no hit.

#37 RAF Strike, Operations Event

Bombing only, no missiles. The Tornado has two steps. A Buccaneer "actual" unit has to join in the strike.

#37/47 NATO Counter Attack, Reaction Event

The convoy is removed because it arrived at a convoy port, the supplies are received as normal. Then, when the card is played the effect of the card is implemented. According to normal rules the convoy is then placed in the Convoy Holding Box.

#38/42 NATO Flexibility, Operations Event

Can not be used to repair a damaged allied facility, only for units.

#40 Perfectly Timed Strike, Operations Event

SEAD hits do not count.

#44 Orion Harpoons, Reaction Event

The required presence of MP does trigger CAP interception according to 17.2: "An Air Unit is present within a Sea Zone with carrier-based FTR prior to completing whatever mission it was sent to perform".

#46 German Tornado, Operations Event

The partial convoy goes on the Northern war track.

#50 Turkish Air Strike, Operation Event

CL#6. The Turkish airstrike card does not have the range to reach Sevastopol. This is more due to a design decision than actual capability (The designer didn't want a 4ops event to be too potentially powerful).

#52 Italian Air Strike, Operation Event

Can be used to attack the Southern War Track.

#54 Strike Strategic Targets (Kola), Operation Event

No FSP's granted to Soviet per 17.23 as it normally would. They can be attacked by any method available, generally an air strike using that process, or cruise missiles using that process.

#55 Strike Strategic Targets (Sevastopol), Operation Event

The effect of hitting C# Nodes is an exception to the rule "a player will always have three cards". They can be attacked by any method available, generally an air strike using that process, or cruise missiles using that process.
